Js, JDW's 1/1/74 itemizes those of my memos Je isolated for me in my effort to retrieve on Caddy. I have gone through 3/73 on these and am confident the remaining ones are in order so in order to get what I did not file under Caddy or with memos and so that you can refile yours, these are those I do not have: two dated 7/17/72 with first lines "Bob Smith:Your conjecture that Murray Chotiner ..." and "Dear Larry, In connection with the best-known;" and "The Watergate Caper, Supp notes 7/29/72." In seeking I also note unflagging interest in Caddy, repreated dissatisfaction over lack interest in him, etc. Or, this is not new interest and contemporaneous belief he was being covered and for some good reason, if reason not explicit...I guess that in the future I should have a second copy of even these small slip notes, one for the subject and one for a chrono file that I now have to the degree I kept them separate...As you now know, hunch was justified by investigation when I was able to make very brief one, re Ford and his closer connection with Hunt than was ever indicated...What is among the surfaced in the official sewer I have been going over and is without question is the totality of the official participation in the corrupting of justice and the aborting of the functioning of all society's protective institutions. It is rottener than the WC stuff. Thanks HW 3/4/74
